	<p>premium options. Premiums will vary if the sum insured changes or if premium rates change.</p> <p>Stepped premiums are calculated each year based on the consumer's age and usually increase each year as they get older.</p> <p>Level premiums are calculated based on the sum insured, the consumer's age when they applied for that cover and the applicable premium rate for that age each year. Level premiums have the cost of providing insurance spread out over a number of years. Level premiums start out higher than stepped premiums but may become lower than stepped premiums at some point in the future. Level premiums do not increase because of the consumer's age; however, level premiums may still change due to other factors.</p> <p>Decreasing Cover is another option for Life and TPD, where the premiums stay the same but the sum insured varies to reflect the increasing likelihood of claim.</p> <p>While this is not an exhaustive list, below are some examples of why premiums may change over time:</p> <ul style="list-style-type: none"> • The cover changes, including if there is an automatic change to the terms of the cover when the consumer reaches a particular age, or an option is added or removed; • The sum insured changes. For example, this may be due to increases under the Inflation Linked Option or the Increases without further Medical Evidence feature is exercised; • There are changes to stamp duty or other charges; or • There are changes to premium rates, discounts or policy fees. <p>Premium rates are not guaranteed.</p>			
	<p><i>The payment of premiums</i> – if premiums are not paid when due, the policy may lapse in which case the consumer would no longer be covered and cannot make a claim.</p> <p><i>Premium payment frequency and method</i> – ability to pay premiums:</p>	✓	✓	✓
